NORTHAIR AVIATION
WHERE INNOVATION TAKES FLIGHT.

About Us

Northair Aviation is a benchmark company in the avionics landscape — a true center of excellence and innovation for pilots, aircraft builders, and aviation professionals.
Headquartered in Italy at the FlyArb airfield in Robecco Pavese (PV11), Northair Aviation acts as the strategic link between manufacturers of next-generation avionics and aircraft builders, offering cutting-edge solutions that redefine industry standards.
Thanks to a highly qualified team, precision technologies, and a vision focused on excellence, we stand out for our ability to create top-quality aeronautical wiring, harbnesses designed to ensure flawless connectivity between Avionics and aircraft systems.

Mission

Northair Aviation's mission is clear: to redefine the aviation industry by providing innovative, reliable, and tailored solutions that meet the highest expectations of our clients.
With a constant commitment to quality and safety, we aim to be the trusted partner for those who seek the best in terms of technology, expertise, and professionalism.
Our goal is simple yet ambitious: to be the driving force that connects technological innovation with outstanding performance, supporting pilots and builders with tools and services that truly make a difference.

OUR COMPETITIVE ADVANTAGE

Northair Aviation is not just a company, but a key pillar in the Avionics sector.
Here's why we are the ideal choice:

- Extreme Precision Aeronautical Wiring
- We craft custom wiring using state-of-the-art machinery for cutting, stripping, and laser-marking cables, ensuring uncompromising quality.
- Advanced Testing and Inspection Technologies
- With cutting-edge control equipment, we test the compatibility and safety of every system, guaranteeing flawless results and compliance with the highest aeronautical standards.
- Unique Market Position
- We operate at the intersection between major avionics manufacturers and aircraft builders, offering a service that combines technological innovation with engineering expertise.
- Perfect Integration
- We specialize in optimizing the connection between onboard instrumentation and aircraft systems, ensuring superior performance and maximum efficiency.
- Quality System UNI EN ISO 9001:2015 - EN 9120:2018, AS9120B

OUR SERVICES

Avionics Sales

We distribute top-tier systems and Avionics for flight control, navigation, and management, selected from the world's most renowned manufacturers.

Custom Wiring Design and Production

We use advanced technologies such as cutting, stripping, and laser marking to ensure the highest precision and quality.

Top-Level Installation and Technical Support

We provide complete service from installation to maintenance, with highly skilled technicians working both in our workshop and at partner manufacturer sites.

High-Level Quality Testing and Control

Every product and system undergoes strict testing using next-generation equipment to ensure optimal performance and uncompromised safety.
